

Christopher Gavigan and Jessica Capshaw
Santa Monica, CA

March 19, 2015

We selected DuPont™ ForeverLawn® Select VR for our backyard. We love spending time with our family in the backyard, but given how it was situated, it always remained damp and virtually unusable. We also had experienced a major grub problem, which attracted raccoons to the lawn—a clear safety concern for our three kids.

Our commitment to using only the safest, most environmentally-conscious products for our home and family led us to ForeverLawn. When we learned that they utilized sustainable technologies, innovative recycled and recyclable materials, and saw how realistic and beautiful their American-made synthetic turf looked, we knew we had found the right solution.

We are especially pleased to save thousands of gallons of water now—particularly during this drought Southern California is experiencing. Our decision to create a backyard with ForeverLawn, and open up our lawn for year-round fun and entertaining, has been transformative for us! We recommend ForeverLawn not just for the superiority of their products, but for their dedication to safety and environmental stewardship.

Sincerely,

Christopher Gavigan
