

GRASS WITHOUT LIMITS

REALISTIC, INNOVATIVE AND ECO-FRIENDLY

ForeverLawn offers premium artificial turf for functional, attractive, eco-friendly landscaping. Experience the luxury of a ForeverLawn landscape, with these added environmental benefits:

WATER CONSERVATION

ForeverLawn synthetic grass requires no water to maintain its lush, green, beautiful appearance year round. The beauty and functionality of ForeverLawn products make them ideal eco-friendly alternatives to natural grass.

ENVIRONMENTAL PROTECTION

ForeverLawn helps protect fresh water supplies and improve environmental quality by eliminating fertilizers, pesticides, and weed killers that are commonly used to maintain natural grass landscaping. Now a perfectly-manicured lawn can be achieved with no mowing, seeding, or edging, which reduces emissions from lawn care equipment.

RECYCLING

ForeverLawn's multi-layered backing system features two different environmentally-friendly materials. The final backing layer is made completely from recycled plastic bottles, and a second layer features BioCel technology created from soybean plants—a 100% renewable resource.

GREEN BUILDING

Green builders may utilize ForeverLawn products to meet U.S. Green Building Council LEED® guidelines.

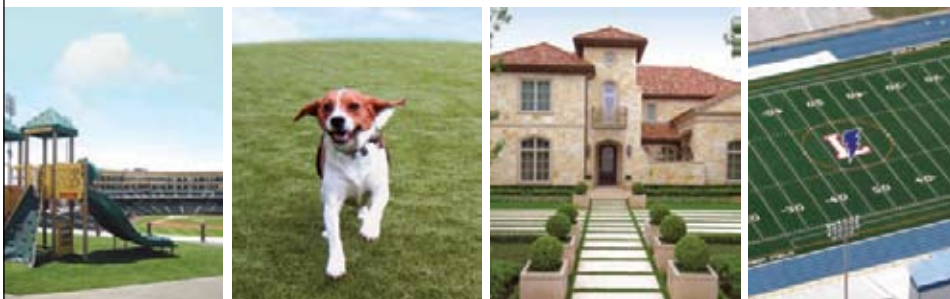

HEALTH AND SAFETY

ForeverLawn turf does not harbor insects or contain allergens present in natural grass. This soft, resilient surface is great to play on, won't leave grass or mud stains, and is CPSC safety approved.

About ForeverLawn

ForeverLawn provides innovative synthetic grass products to create better landscapes worldwide. In areas where real grass is difficult to grow or maintain—due to high traffic or poor conditions—ForeverLawn offers a natural-looking alternative that is beautiful, functional, and durable. ForeverLawn—Grass without limits.
