Why K9Grass® Elite?

K9Grass® by ForeverLawn® is the leading synthetic turf solution designed specifically for dogs. K9Grass Elite combines antimicrobial, multi-colored nylon blades for incredible realism and performance while also providing waste-handling functionality. ForeverLawn's proprietary knitted backing provides 100% "edge-to-edge" drainage at extreme rates. K9Grass Elite, with its unique all-nylon construction and heat resistance, is also warrantied against damage from reflective light.

Elite features

no infill

infill is problematic because it slows drainage, harbors waste, and makes cleaning difficult.

knitted backing

providing complete edge-to-edge drainage at extreme rates (3000"/hour).

15-year warranty

warrantied against damage from reflective light.

nylon blades

knitted, 100% nylon blades.

maximum realism

three-color combo of blades for maximum realism.

Unfortunately, I did not know about K9Grass and opened with another popular brand of artificial turf, which had a solid urethane backing, holes for drainage, and used infill. Needless to say, it was a disaster and I was soon on a quest to find a higher quality artificial turf. I discovered K9Grass and soon the Karmie Brothers came to my rescue.
