Why K9Grass® Eco™?

K9Grass Eco is an environmentally friendly synthetic grass for dogs, constructed entirely of polypropylene and polyethylene to enhance end-of-life recyclability. The thatch blades contain **30% recycled content**. Soft and beautiful, with the same pet-accommodating features found in other K9Grass products, K9Grass Eco offers the "greenest" possible option for any yard.

Eco features

no infill

infill is problematic because it slows drainage, harbors waste, and makes cleaning difficult.

maximum realism

natural green grass with tan thatch

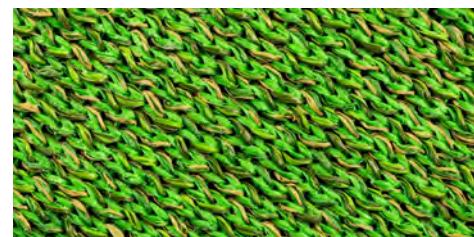

recycled content

30% recycled content in thatch

15-year warranty

knitted backing

providing complete edge-to-edge drainage at extreme rates (3000"/hour).

100% recyclable

100% polypropylene and polyethylene components

I had had it! I wanted to entertain but couldn't because my yard smelled so bad. You (K9Grass) came to my rescue. I would never ever recommend anything else!
