

PlayMounds™

PRODUCT SPECIFICATIONS

Patented Construction

**1/2" Protective
EPP foam layer**
Weight: 1.3 lb density

EPS foam core
Weight: 1.5 lb density

Expandable urethane glue
GREAT STUFF PRO™ Construction
Adhesive for adhering PlayMound
component pieces together to form
various styles of PlayMounds.

**Premium-backed
Playground Grass™
by ForeverLawn®**

**Nailer board
for securing the
synthetic turf**

How are PlayMounds made?

- A core is fabricated from expanded polystyrene (EPS).
- A half-inch layer of expanded polypropylene (EPP) is added.
- The patented layering system provides incredible durability and longevity.
- Finished with rugged premium-backed Playground Grass™ by ForeverLawn.

Installation

- PlayMounds' resilient contours are glued together to form one large cohesive mound, berm, or undulation.
- A galvanized steel pole is glued into the bottom section of a PlayMound and sunk into a concrete footer when needed.

Benefits of PlayMounds:

- Built-in safety surface with a nine-foot critical fall height rating.
- Ability to integrate play components like slides, towers, and tunnels into the PlayMounds.
- Antimicrobial premium turf options promote health and safety.
