Why K9Grass® Endura?

K9Grass® Endura is specially crafted with soft, narrow nylon blades, tan thatch, and knitted backing to provide unmatched realism and drainage. Endura increases not only beauty and safety but is also designed to resist damage from magnified reflected light.

Endura features

no infill

infill is problematic because it slows drainage, harbors waste, and makes cleaning difficult.

15-year warranty

warrantied against damage from reflective light.

Flow-Through Backing™

consisting of 2000/1 polyester warp and 5oz. SBR latex.

nylon blades

knitted, 100% nylon blades.

K9Grass is easily cleanable and stays green all year long, which means no muddy dogs or ugly patches on the lawn.
What owner wouldn't love that?"
